WP Hide & Security Enhancer

Faire en sorte que ce ne soit plus un WP

- Personnalise Admin URL
- Bloque l'URL d'administration par défaut
- Personnaliser le nom de fichier wp-login.php
- Google Captcha Blocs par défaut wp-login.php
- Bloque par défaut wp-signup.php et XML-RPC API
- Ajuste l'URL du thème
- Crée un URL de thème Nouveau enfant
- Modifie le nom du fichier de style de thème
- Personnalise wp-include
- Bloque les chemins par défaut wp-include
- Bloque le contenu wp par défaut
- Personnalise l'URL des plugins
- Bloque les chemins des plugins par défaut
- Supprime la version WordPress
- Bloque Meta Generator
- Désactive l'emoji et le code javascript requis
- Supprime la balise pingback
- Supprime wlwmanifest Meta
- Supprime rsd_link Meta Supprime wpemoji

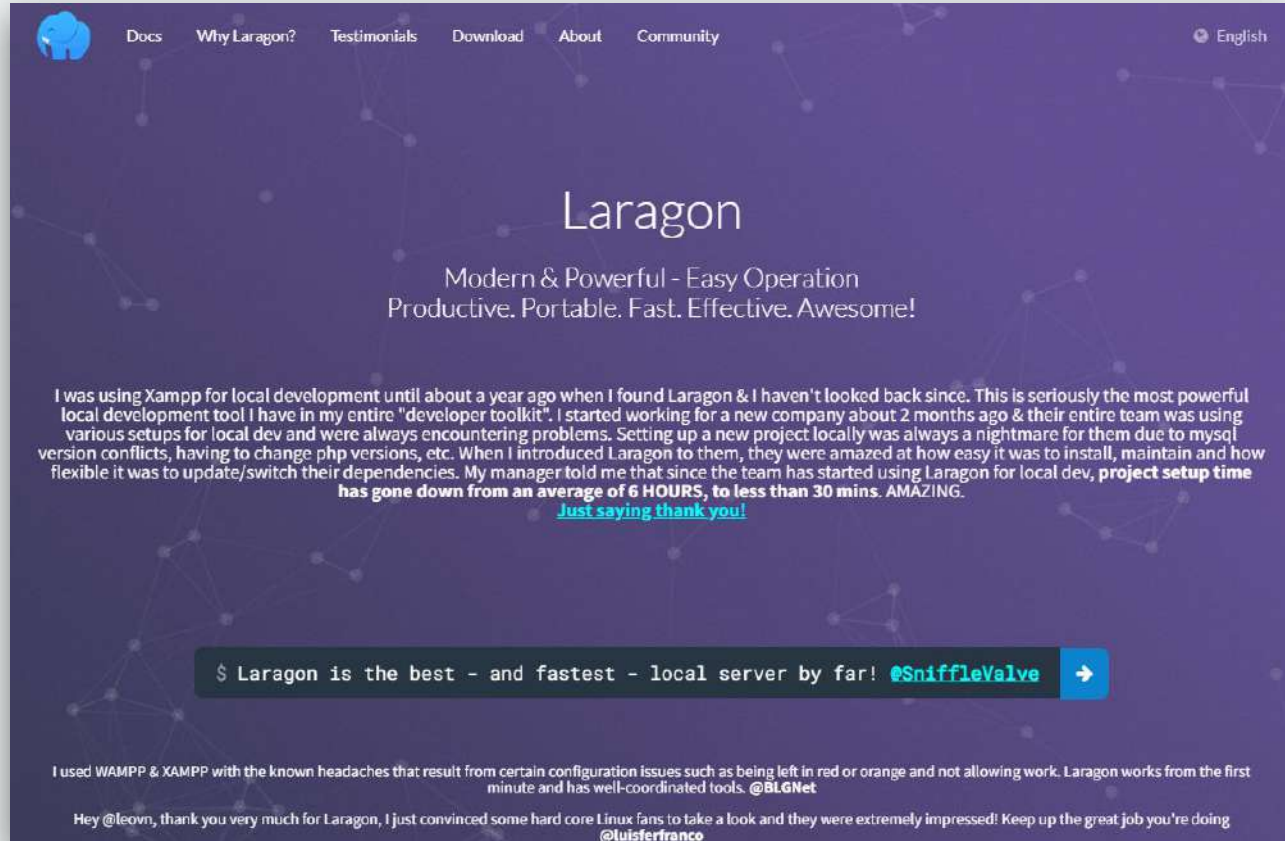

The screenshot shows the WordPress plugin page for "WP Hide & Security Enhancer" by Code Nsp. The page features a blue header with navigation links for "Mes Favoris", "Tests Bêta", and "Développeurs", along with a search bar. The main content area has a yellow and purple banner with the text "TOTAL WordPress data protection" and "WP Hide & Security Enhancer". Below the banner is a green notice stating "Cette extension n'est pas encore traduite en Français. Aidez à la traduction!". The page includes tabs for "Détails", "Avis", "Installation", and "Développement", and a "Soutien" link. The "Description" section states: "WP-Hide a lancé le le moyen le plus simple de cacher complètement votre WordPress les fichiers de base, la page de connexion, le thème et". On the right, technical details are listed: "Version: 2.3.1", "Last updated: 2 months ago", and "Active installations: 70.000+". A "Télécharger" button is visible in the top right corner.

Laragon

Serveur local pour développement

- Rapide
- simple
- fonctionnalités WP

The screenshot shows the Laragon website homepage with a dark purple background and a network diagram pattern. The navigation menu includes 'Docs', 'Why Laragon?', 'Testimonials', 'Download', 'About', and 'Community'. A language selector for 'English' is in the top right. The main heading is 'Laragon' with the tagline 'Modern & Powerful - Easy Operation Productive. Portable. Fast. Effective. Awesome!'. A testimonial from a user describes switching from Xampp to Laragon, highlighting a significant reduction in project setup time from 6 hours to under 30 minutes. A dark terminal-style box contains a tweet from @SniffleValve praising Laragon as the best and fastest local server. At the bottom, there are two more testimonials: one from @BLGNet comparing Laragon to WAMP and XAMPP, and another from @Luisfernanco thanking @leovn for Laragon.

Laragon

Modern & Powerful - Easy Operation
Productive. Portable. Fast. Effective. Awesome!

I was using Xampp for local development until about a year ago when I found Laragon & I haven't looked back since. This is seriously the most powerful local development tool I have in my entire "developer toolkit". I started working for a new company about 2 months ago & their entire team was using various setups for local dev and were always encountering problems. Setting up a new project locally was always a nightmare for them due to mysql version conflicts, having to change php versions, etc. When I introduced Laragon to them, they were amazed at how easy it was to install, maintain and how flexible it was to update/switch their dependencies. My manager told me that since the team has started using Laragon for local dev, **project setup time has gone down from an average of 6 HOURS, to less than 30 mins. AMAZING.**
[Just saying thank you!](#)

\$ Laragon is the best - and fastest - local server by far! [@SniffleValve](#) →

I used WAMPP & XAMPP with the known headaches that result from certain configuration issues such as being left in red or orange and not allowing work. Laragon works from the first minute and has well-coordinated tools. [@BLGNet](#)

Hey [@leovn](#), thank you very much for Laragon, I just convinced some hard core Linux fans to take a look and they were extremely impressed! Keep up the great job you're doing [@Luisfernanco](#)

Getting Started

- Overview
- Install
- Quick Start
- Screenshots
- Directory Structure
- Command Line

Features

- Pretty URLs
- Quick app
- Quick add
- Quick share
- Portable
- Isolated
- Reliable
- Disposable
- Fast
- Lightweight
- Easy to use
- Easy to extend
- Modern
- Powerful
- Flexible
- Mail Catcher
- Mail Sender
- Terminal

Quick start

Having a Wordpress CMS in a few minutes

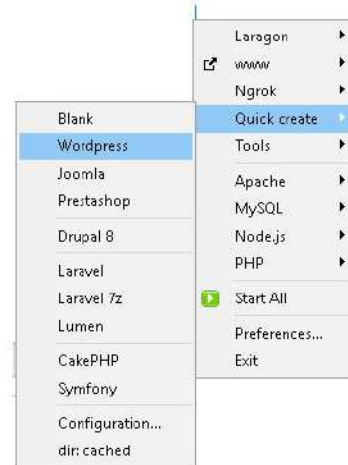

1. Start Laragon, then click "Start All"
2. Click **Menu > Quick app > Wordpress**, type a name - such `myblog`
3. Laragon will display a Window and:

- Create correspond database: `myblog`
- Download the latest version of Wordpress
- Extract the code to `C:\laragon\www\myblog`
- Generate correspond pretty URL:
<http://myblog.test>

Congratulations! Within few minutes, you have a local CMS to hack with no effort.
