“Studio” par WordPress

- Outil de site en local
- Dispo sur Mac, pas encore sur Windows

The screenshot displays the WordPress Studio interface for a local development environment. At the top, the WordPress.com Developers logo is on the left, and navigation links for Docs, Blog, Studio, and Contact are on the right. The main heading reads "Build Fast, Ship Faster with Studio". Below this, a paragraph describes Studio as a fast, free way to develop locally with WordPress, highlighting its ability to share local sites and maintain a smooth development process. A "Download for free" button is present, along with a note about terms of service and privacy policy. At the bottom, there are two buttons: "Download for Mac" and "Request early access for Windows". The right side of the screenshot shows a preview of the "Coast Walkers" theme, which features a dark background with a green and blue checkered pattern. The theme preview includes a sidebar with navigation options like Overview, Share, and Settings, and a main content area with a "Customize" section containing options for Site Editor, Colors, Patterns, Navigation, Templates, and Pages. The "Open in..." section offers options for Mobile, VS Code, and Terminal.

Radicle is an opinionated starting point for WordPress projects with the Roots stack

Laravel components for WordPress plugins and themes

WordPress boilerplate with Composer, easier configuration, and an improved folder structure

High-performance build system that supports SWC, esbuild, and Babel

WordPress starter plugin with example blocks, REST endpoints, and a starter test suite

WordPress starter theme with Laravel Blade components and templates, Tailwind CSS, and a modern development workflow

WordPress LEMP stack with PHP 8.2, Composer, WP-CLI and more

Bedrock

- Organisation de l'écosystème
- Changements de répertoire
- Meilleure utilisation de GIT
- Plugins chargés par Composer

✓ Utilise la fonctionnalité WordPress Core pour les personnalisations

✓ Meilleure intégration Git pour le développement WordPress

✓ Configuration WordPress basée sur Composer la plus utilisée

Standard WordPress structure

```
|— index.php
|— license.txt

Blog Gestion de projet : <https://blog-gestion-de-projet.com/>

- Plein de ressources gratuites (et payantes)
- Vraiment utilisable

The screenshot shows the website's header with a logo and navigation links: "L'équipe", "Thématiques", "Produits", "Formations", "Vidéos", and "Contact". Below the header, the text reads "Tous nos contenus sont organisés dans des dossiers, regroupés à leur tour dans 5 thématiques différentes. Naviguez dans nos thématiques et trouvez des notions clés, conseils, démarches, outils et REX".

Gestion de Projet

Retrouvez les 5 étapes de la gestion de projet ainsi que les outils d'aide à la gestion
